PROJECT CHARTER

Project Name	TeaStir
Date Produced	October 13th 2021
Project Goals	Our project goal is to have a working tea recommendation engine that can fulfill the task of giving a list of teas to a user based on their preferences.
Project Objectives	Our objectives are to create a database of teas for the engine to pull from, to create an algorithm that can use a similarity score to rate how close a tea ranks to a user's preferences and to create a survey that can accurately capture what makes a user enjoy a cup of tea.
Project Budget	$0
Project Sponsor	Timothy Macaig
Project Manager	Nicolas Ansell

Additional Key Project Stakeholders

Nicolas Ansell: Project Manager, main role is mainly to focus on front-end development and design but can also shift around to help with pain points.
Yuting Li: General Developer, main role is to work on both sides of development helping where the project is lacking and helping pick up the slack.
Dinesh Dalip: Back-end Developer, main role is to work on the back end database and algorithms.

Overall Project Milestones	**Dates**
Project activity #2 (Team-based project work)	October 15, 2021 @ 10:00 am
Project activity #3 (Team-based project work)	October 29, 2021 @ 10:00 am
Project activity #4 (Individual-based project work)	November 5, 2021 @ 10:00 am
Project activity #5 (Team-based project work)	December 2, 2021, @ 10:00 am with all project deliverables due December 6

Overall Project Risks

Resulting with a failing grade in the class
